

## **JOB OFFER: JUNIOR/MEDIOR JAVA EE DEVELOPER (M / W)**

### **Who are we ?**

Based in Mons, IT-OPTICS puts the experience and skills of its engineers, specialized in multiple domains such as Linux, Windows, networks, databases in the service of its customers. The goal of our engineers is to bring the IT infrastructure to its maximum operational level using the power of Free Software and GNU / Linux, without neglecting commercial and proprietary software. The company ITOPTICS consists of a dozen engineers and has today become one of the key players on the Belgian open source market.

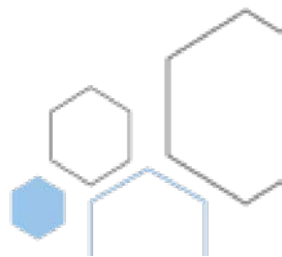

**Our market: Editions of open source software in various fields, IT services, business digitalization services, logistics 4.0:**

### **Missions**

By working at IT-OPTICS, you contribute to the development of a collaborative solution dedicated to the management of industrial, logistic and traceability processes based on global standards relating to the Supply Chain.

- In our development department you will work on:
- programming new application functions
- making adaptations to existing programs
- testing and documenting programs
- pushing the applications to their full potential/efficiency

As a Junior Java Developer, you join a small dynamic team with a friendly atmosphere and interesting challenges. You will be responsible for programming new application functions, making adaptations to existing programs, testing and documenting the programs, in order to be able to constantly provide high-performance applications. Your development tasks will relate to both the "user-friendly" and quality front-end parts and the robust back-end by promoting reuse.

## Wanted profile

We are open to first job or experienced profiles.

Your motivation will be a prime selection criterion.

- Bachelor/Master in informatics
- Knowledge of the following technologies: Java EE, Spring, Hibernate, JSF, Javascript / Angular, Design Pattern, Web Services Soap (XML), Web Services Rest (JSON), DBMS / SQL, Agile
- Curious and passionate about new technologies, you have an excellent capacity for learning.
- You are able to work independently, methodically and are able to set your priorities.
- You are communicative, friendly and proactive

## Conditions

- CDD contract to CDI contract
- Start date: To be discussed
- permit License B and car are essential
- Workplace: Wallonia

## Advantages

Whether in application development, infrastructure or support services, it is possible to take training, specialize or have interesting career opportunities. IT-OPTICS ensures that it offers working conditions allowing a good work-life balance, an attractive salary, hospitalization insurance, a second pension pillar, meal vouchers, etc.

- Meal vouchers
- Group Insurance
- Health Insurance
- Young and dynamic team
- Training

## Appliances:
